

## About Pachyderm:

Pachyderm a free, easy-to-use authoring tool for non-technical faculty and students to create online media-rich resources. Designed for people who have little or no multimedia authoring experience, Pachyderm is accessed through a web browser and is as easy to use as filling out a web template form. Developed as part of a consortium of universities and museums led by the New Media Consortium, Pachyderm is supported by Academic Technology Services (ATS) and the Center for Distributed Learning (CDL).

## Create Media-Rich Content Using Pachyderm

Pachyderm enables faculty, staff and students to create media-rich content to share over the web. While most commercial web authoring tools are designed for web professionals and are either too complicated or too time-consuming for occasional and non-technical users to use effectively, Pachyderm is relatively simple to use.

### Benefits of Pachyderm:

- Create media rich presentation easily
- Publish automatically to the web with a click of a button
- Enable authors to focus on creating and organizing content rather than dealing with the technical complexity of more typical web publishing
- Provides easy playback feature for your immediate review on your local computer
- Used widely to create resources for the ELIXR, Transforming Course Design, and EnACT projects, including pilots with faculty and students for creating course materials and assignments
- Publishes in Flash so its presentations are compatible across browsers and optimized for the web
- Extends easily and allows for new templates to be developed and shared
