If purchases were made and the % "SABRC Compliant" rate (column 4) is deficient, meaning that it is less than 50% for paint, antifreeze, and tires or is less than 75% for any of the remaining categories, please provide an explanation. An explanation for all deficient categories is important during the review of your annual report. In addition, please include any other relevant information or issues.

The CSU is in the process of implementing a new ERP system to centralize and manage procurement spend. This improvement will lead to significant efficiencies in reporting on the 16 Cal-Recycle product categories and will directly impact data collection and reporting. We have included the recycled categories in the new CSU Buy platform for tracking purposes to enhance reporting. For carpet, glass, oils, pavement surfacing, and tire-derived products, the CSU will work on establishing relationships with suppliers that can provide PCC (Post-Consumer Content) in these categories. We will create systemwide contracts to incentivize all 23 campuses to purchase PCC materials from these suppliers. Additionally, we will collaborate with prime contractors to utilize and capture PCC spend from public works projects. Regarding paper, plastic, and printing paper the CSU will create awareness by highlighting cost savings environmental impact and compliance benefits by regularly review and update procurement policies and practices to ensure they align with sustainability goals and Cal-Recycle requirements. For antifreeze, paint, and tires the CSU is partnering with suppliers and our campuses to collaborate on ways to increase our PCC purchasing by establishing a sustainability program within these product categories. We will work on

leveraging the system wide contracts we have in place to continue to include more PCC recycled products.

Contracts and Procurement

State agencies must procure post-consumer recycled content products whenever feasible, including as part of contracts. Each state agency shall require the businesses with whom it contracts to use, to the maximum extent economically feasible in the performance of the contract work, recycled products. Please refer to [Public Contract Code Section 12200-12217](#). State agencies should track all applicable purchases within [Statewide contracts or leveraged procurement agreements](#).
