Designing Your Career: The Networking Reframe (2:04 mins)

Check out the following pages from the Career Success Guide to learn more about networking:

- Networking Brainstorm Worksheet
- Career Conversation Questions and Sample Email
- You can also access amazing professional and diverse communities by exploring our Resources of Diverse Populations page

LinkedIn

LinkedIn is the world's largest professional network on the internet. A LinkedIn account allows you to:

- Develop your professional profile/brand that highlights your qualifications and accomplishments
- Network with professionals, alumni, and students
- Search for and apply to job/internship opportunities and be recognized by recruiters
- Provide and receive recommendations to better market yourself
- Stay-up-to-date on various topics by joining interest groups and following companies/agencies of interest

STEM CAREERS

STEM (**S**cience, **T**echnology, **E**ngineering, **M**athematics) events at SDSU give students a chance to learn about occupations and meet professionals in these fields.

STEM events

Career Services recognizes the importance of STEM-focused programming to help students find internships and careers in their desired field.

Science, Technology, Engineering & Math

Programs include workshops and opportunities to network with employers who hire STEM students. Programs take place throughout the year, but most STEM programs are scheduled to coincide with the STEM Employment fair in October, and the Spring Career and Internship Fair in February.

Sample STEM events include the STEM Technical Resumé workshop and the STEM Technical Interviewing workshop.

The Security Clearance Symposium is a STEM sponsored event, but is open to students of all majors.

Events are open to undergraduate and graduate students at all levels. For more information, view the current calendar of events, or visit Handshake.

October is STEM Careers Month

Each October SDSU Career Services, in collaboration with the College of Engineering and the College of Sciences, offers the campuswide STEM Careers Month. October events are offered in an effort to build new collaborations and centralize STEM-related opportunities on campus.

Career Services STEM Contact

Please call our office at 619-594-6851 or email stemcareers@sdsu.edu to inquire about STEM-specific career services.

Internships are Important

Did you know that working at least one internship increases your probability of getting a better position upon graduation? It's important to start internship efforts early in your course of studies. Learn more about internships.

Careers FAQ

Joel Farias, superintendent with DWR works onsite in DWR's Flood Maintenance and Operations Branch, working with scientists from CDFW, performs aquatic vegetation removal from the borrow canals of the Sutter Bypass to clear a migration pathway and improve water quality for migrating adult spring-run Chinook salmon, which will also rescue fish stranded below these barriers.

About DWR   Careers

What is a classification?

A classification is a group of positions with sufficiently similar job duties and responsibilities that the same title may reasonably and fairly be used to designate each position allocated to the classification. Examples include Information Technology Associate and Office Technician.

Do I need a college degree or a high school diploma to apply for a position with DWR?

It depends on the position(s) you are interested in. DWR offers various opportunities for a range of work and education experience levels. Information regarding minimum qualifications can be found on all job postings.

Do I have to be a US citizen to work for the State of California?

Most classifications at DWR do not require candidates to be a US citizen. However, selected candidates must have the necessary work visas and meet all requirements set forth by the United States Citizenship and Immigration Services to be eligible to work in the United States.

Are exams/assessments required for all positions at DWR?

Most positions at DWR require applicants to establish eligibility by taking the exams/assessments developed for that classification. However, there are some non-testing classifications that you can apply to without taking an exam/assessment. Make sure to review the job posting thoroughly to determine if you need to take an exam/assessment.

Where can I take the exams/assessments?

opportunities. This can range from brief 30-minute conversations to developing long-term mentoring relationships.

The Alumni Mentoring Program offers two different components of mentoring that can work with any schedule or level of commitment:

FLASH MENTORING

Have a question about a certain company or industry? Need someone to review your resume or graduate school application? Flash Mentoring is for you! **Flash Mentoring is one-time or short-term mentoring** and is perfect for individuals who may not have the time to commit to a long-term mentoring relationship. **As a student or recent graduate, you have the option to connect with as many alumni as you'd like with any career-related questions you may have.**

- **Flash Mentoring is open to:**
  - All currently enrolled Cal State LA students
  - Recent graduates (Classes of 2019 - 2021)
- Select and connect with experienced alumni and industry professionals from all fields and majors, both online and in-person.*
- Perfect for those with busy schedules who are unable to commit to a traditional, long-term mentoring relationship.

TRADITIONAL MENTORING

Your alumni mentor is here to support you in your professional development over two semesters. The Traditional Mentoring component pairs qualified students and recent graduates with experienced alumni, industry professionals, or faculty/staff that most closely matches their interests and career goals. **Mentee and mentor work together one-on-one towards a mentee's career goals throughout the academic year.** Participants are able to join the Traditional Program in addition to the Flash Mentoring component.

- **Traditional Mentoring is open to:**
  - Undergraduate students with sophomore standing and above (at least 30 units completed) and minimum 2.5 GPA.
  - Graduate students with a minimum 3.0 GPA
  - Recent graduates (Classes of 2019 - 2021)
- Select and connect with an experienced alum or industry professional from any field or major.
- Work one-on-one with your chosen alumni mentor throughout the duration of the academic year, both online and in-person.*
- Access to additional online resources to assist with career exploration and professional development.

To learn more and register as a mentee, please click the button below. For additional questions, please contact us at alumnimentoring@calstatela.edu or (323) 343-2586.

LEARN MORE

In-person meetings are encouraged once safe to do so.
